PROFILE SUMMARY

Product and AI enthusiast with 12+ years experience, building Enterprise & Consumer products. Shapes long-term strategy and drives Delivery, from building Data Plane at SAP to AI-powered Incident Reporting at Atlassian or turning high-volume Trace data into Insight at New Relic. Also, independently vibe-coded and launched a profitable consumer product from scratch.

WORK EXPERIENCE

12+ YEARS

New Relic | Lead Product Manager

Aug 2024 - Present

Helping developers find the cause of slow or failing applications amid overwhelming performance data.

- Own Adoption & Retention of Distributed Tracing module within APM Domain. Set the FY28 Tracing Strategy and Roadmap to **improve Entity & Service Coverage Ratio from 34% to 80%** for the number of Services sending Trace Data
- **Improved MAU by 16%** between Aug'24 and Jun'26 by launching features like Intelligent Exemplar (IE) and Attribute Correlation Analysis (ACA) to surface the responsible Trace Attributes for any Error/ Latency spike within the Service, in one click
- Improved Tracing investigations with AI-powered insights; vibe-coded the prototypes for Customer feedback and refined prompts & outputs through Evals to help developers, build the features faster

Astro Rakesh Jain | Individual Project

Apr 2026 - Present

Built and launched a paid numerology-based name-correction service | astrorakeshjain.in

- Built the Website, Recommendation Engine and Payment Gateway using **Claude**, providing Astrology & Numerology related Services, using tools like Vercel, Supabase, GitHub, Meta Suite, Zoho, GoDaddy and Zixflow.
- Generated revenue of **INR 2.5 lakh in Aug 2026** with profit margins steady at 60%

Atlassian | Product Manager

May 2021 - Jul 2024

Envisioned and Built a path to Automated Incident Resolution.

- Drove MAU from **60K in Dec'21 to 340K in Jun'23** and **Improved CSAT from 43% to 72%** by enabling end-to-end Incident Management User journey within JSM and launching key customer features across Automated Incident Resolution, Incident Triaging and Root Cause Analysis
- Prepared the long term strategy for **Automated Incident Resolution**, progressing from Playbooks and Runbooks towards Intelligent Incident Resolution with Knowledge gathered from Past Incidents and Post Incident Reports (PIR)
- Launched Automated PIR creation feature using **Gen AI and 360 Degree context** from other ITOPs objects like Alerts. The rate for Major-incident **closure** and PIR creation improved from 0.2% to 34% in first 3 quarters, which was the initial step towards Automated Incident Resolution
